

## Seamungus & Seamungus Crumble

Health tonic and planting food for all plants including natives, lawns and bare-rooted roses

# Seamungus & Seamungus Crumble

Your plants will just love Seamungus ...jam packed full of goodness, Seamungus is a soil and plant conditioner, manufactured by combining the very best of composted raw materials – seaweed, fish, humic acid and manure. Now available in two forms – original pellet (blue pail) and new ‘crumble’ (green pail) – the Seamungus formula remains the same for both.

**Seamungus will retain up to 70% of its own weight in moisture – significantly increasing the soils ability to hold onto water and nutrients.**

Seamungus undergoes a unique composting process, specifically developed to stabilise the nutrients, maximise nutrient availability and to ensure the product is free of any parasites, pathogens and weed seeds. Most importantly, the resultant product retains the microbiology necessary for a ‘living’ product.

Whilst Seamungus contains a wide range and good levels of plant nutrients, it is perhaps the additional unique properties contained within seaweed that provide the catalyst for providing higher yields of sustained quality.

**Seamungus will help your plants resist heat, drought and frost, along with pests and disease.**

Seaweed contains a number of naturally occurring growth stimulants – fantastic for promoting plant and root growth and development. Seaweed is also recognised for its ability to retain moisture and increase the moisture level of the plant’s cell sap – this increases the plant’s ability to resist frost and heat stress.

Seamungus will help increase resistance to pests and disease, stimulate healthy growth (both above and below ground) and most importantly, generally improve the wellbeing of your soils and plants.

### Certified Organic

Seamungus is a BFA Certified Organic product.

Whether growing organically or not, the rigorous BFA Certification process ensures that each container of Seamungus maintains a consistent high quality.

**The “crumble” form is ideal for lawns, great for use in dry conditions and where more immediate breakdown is required.**

### Applications

Suitable for year round application as a health tonic and planting food for all plants including natives, lawns and bare-rooted roses.

Seamungus – the perfect plant health tonic to revitalise all your plants throughout the year.

### Application rates

(Pellet or Crumble)

Gardens (Established) – apply 50g (1 scoop) per square metre every 6-8 weeks throughout the year or as required.

Gardens (Planting) – apply 100g (2 scoops) per plant to base of hole and cover with 1-5cm soil.

Lawns (Established) – apply 50g (1 scoop) per square metre every 10-12 weeks throughout the year or as required

Lawns (Planting) – incorporate 100g (2 scoops) per square metre into the soil prior to planting or laying.
